PROFESSIONAL SUMMARY

Aspiring product manager with experience at Airtel Payments Bank across distribution, product strategy, and enterprise alliances. Proven ability to identify user and channel inefficiencies, design targeted interventions, and scale solutions driving **35% AEPS growth** and **43% Suraksha sales growth**. Combines fintech domain expertise with hands-on product building (**SQL-based learning platform**) and user research.

EDUCATION

MBA Xavier Institute of Management, Bhubaneswar (XIMB)	2024
B.Tech. (Computer Science & Engineering) Gandhi Engineering College (BPUT)	2021

PROFESSIONAL EXPERIENCE

Zonal Manager – Sales & Distribution	<i>Airtel Payments Bank</i>	Jan 2025 – Present
- Identified low-activation retailer segments and deployed targeted incentive + support models through CMS distributors, driving 35% QoQ growth in AEPS transactions (Q2 FY25) - Redesigned channel engagement and communication cadence, leading to 43% growth in Suraksha sales - Designed and executed a location expansion strategy, launching 5 new service outlets in 3 months to achieve full pin code coverage - Onboarded 5 enterprise clients (5,000+ workforce each) onto salary solutions, generating 2,000 monthly transacting users on APB products - Grew enterprise debit card sales 4x (500 → 2,000 cards) in 2 quarters while sustaining monthly unique user activation		
Management Trainee	<i>Airtel Payments Bank</i>	Jul 2024 – Dec 2024
Product - Conducted market benchmarking and secondary research across MSME lending, identifying key trends and opportunity areas for product expansion - Analyzed alternative underwriting models (cash-flow based, GST-linked) to improve credit access pathways for underserved MSMEs - Assessed feasibility of OCEN and ONDC participation, contributing to early-stage roadmap exploration Corporate Alliances - Diagnosed 6 inefficiencies in partner onboarding (TAT 2x competitors, late-stage compliance rejections, sequential IP/SIT/UAT testing); proposed pre-approval framework and parallel processing to compress onboarding cycle - Designed KAM performance framework introducing 5 new KPIs (Activity Rate, Retention, NPS, Cross-Sell Index, Collection Efficiency) beyond existing volume metrics - Built partner risk segmentation model and benchmarked alliance TAT against competitors to prioritize process automation opportunities.		
Strategy Intern – MSME Department	<i>Government of Odisha (with PwC)</i>	Apr 2023 – Jun 2023
- Worked on the ₹6,000 Cr RAMP initiative (World Bank–GOI), conducting field research across 100+ MSMEs in 14 sectors - Identified labour participation gaps and designed a migration tracking system projected to increase female workforce participation by 20% - Conceptualized a digital credit access platform to improve loan approval rates by 40% for micro-enterprises - Designed a service provider marketplace to reduce turnaround time by 10%		

PRODUCT & TECH PROJECTS

Nykaa Fashion – Conversion Optimization	<i>Capstone Project, Airtribe</i>	2026
Diagnosed a ₹225 Cr GMV leakage across 19M non-converting users (85.6% of active base) on a 0.9% conversion rate platform		

- Conducted primary user research (surveys + **70+ VoC insights**) and identified **return anxiety and fit uncertainty** as key conversion barriers
- Prioritized 11 solution ideas using **RICE framework**; designed UGC Fit Intelligence Layer and Return Experience Redesign targeting **79% of leakage**
- Built interactive mobile prototypes (**16 screens**) and defined a GTM strategy targeting **55% RPU lift (₹143 → ₹222/month)**

Zomato – Tier-1 Food Delivery Retention Strategy	<i>Capstone Project, Airtribe</i>	2026
• Diagnosed a “Convenience Paradox”: 72 mins/month idle browse time, 54% checkout hesitation, and 16–22 min delivery variance collapsing Day-30 retention to 3.7% • Defined 2 OKRs with 6 KRs prioritizing variance reduction over speed; projected funnel fixes to lift conversion from 6% to 9%+ and unlock ₹600 Cr+ annual GMV • Built weekly cohort framework with 4 behavioural segments and mapped product interventions (AI personalization, proactive delay credits, Day 5–7 re-engagement) to retention findings		

Badcode – SQL Learning Platform	<i>Independent Product Build</i>	2026
• Built a browser-based SQL learning platform with a “write → validate → hint” learning loop • Designed an 8-level structured curriculum and real-time query validation system		

SKILLS

Product & Business: Product Strategy, User Research, Market Analysis, Cross-functional Execution

Data & Tools: SQL, Excel, Python, Claude Code, Cursor, Antigravity, Git, Figma
